The Business

Adcorp Computers was established in 1983. In IT terms we are old. In fact, we are one of the oldest established IT firms in NSW. We service clients in both, Brisbane and Sydney as well as many areas throughout regional NSW. Over the years our company's products and services have changed as the industry and our business has developed. We focus on small to medium sized business. Over the past 28 years and throughout all the changes in the IT industry we have always provided personal professional service to our client base. We believe the IT industry is a service industry not a commodity industry. We provide solutions not boxes.

We supply on-site and remote technical support, systems analysis and design, on-site and remote training, all brands of hardware and software. We are Microsoft Certified, members of the Microsoft Developers Network and Partner Research Panel, Certified Microsoft Small Business Specialist, VoIP Specialist Engineers, HP Business Partners, OKI Business Partners, Trend Micro VAR's, Gold Partners for OpenOffice.net software, POS & Industrial Touch Screen distributors and design & manufacture our own Industrial Control Units (ICU's). We hold regular training and development courses covering technology, software, small business management and sales training.

Our Mission

Being a small business ourselves with staff and resources spread all over NSW and southern Queensland our team works together as one, by utilising the technology we recommend to our clients. This way every member of our team has a first hand knowledge of the needs of our clients. We use what we recommend; this is because we believe in the products we sell, we use and tested each solution before we recommend it. After all, we are exactly like our clients. We have the same needs and issues and require technology that works, just like them. Our goal is to provide quality workable technology and provide best practice solutions and advice to our clients. We offer genuine guarantees of service and support.

We build a very close relationship with each and every client getting to know their business, as well as we know our own. Some of our major clients have been clients for over 23 years. We rarely need to advertise with most of our new clients coming from referral business (the best form of advertising) and the best compliment our clients can give us. Our success relies on their success.

If you would like to know more about our service don't ask us, ask one of our many clients. If however you would like to know more about the services we offer, we look forward to answering your call. When you call us, we answer. There's no computerised virtual receptionist, no queues, just a normal everyday person, just like you whose here to help.

And when you do become a client, you won't have to identify yourself when you call, we'll know who you are, because like all our existing clients we'll make it our business to know you and yours.
